

Add your code below following the instructions given in the course

## Data Science Tools and Ecosystem

In this notebook, Data Science Tools and Ecosystem are summarized.

### Objectives:

- Languages that Data Scientists
- Libraries used by Data Scientists
- Data Science Tools
- Examples of arithmetic expression in Python

Some of the popular languages that Data Scientists use are:

1. Python
2. R
3. SQL

Some of the commonly used libraries used by Data Scientists include:

1. Pandas
2. Numpy
3. Matplotlib

### Data Science Tools

---

Jupyter

RStudio

Apache Spark

## Below are a few examples of evaluating arithmetic expressions in Python

This a simple arithmetic expression to mutiply then add integers

```
In [11]: (3*4)+5
```

```
Out[11]: 17
```

This will convert 200 minutes to hours by diving by 60

```
In [14]: 200/60
```

```
Out[14]: 3.3333333333333335
```
